

TelaPoint – A Smart Choice for Fuel Retailers

As a retailer, you know that business intelligence and actionable data can greatly improve your fuel margins. TelaPoint's suite of web-based applications can help you lower overall supply and transportation costs, improve your ability to react to market swings, and reduce the cycle time for billing.

- Manage inventory, forecast delivery projections, and plan orders – resulting in fewer run-outs, diversions, and split-loads, as well as sizeable reductions in excess in-ground inventory
- Purchase fuel at the optimal time, place, and quantity
- Efficiently schedule transportation resources in less time and with fewer mistakes.
- Receive and transmit information easily to and from your drivers via a mobile handset
- Improve fuel risk mitigation and implement environmental compliance easily and cost-effectively

Delivering solutions to reduce fuel supply chain costs

At TelaPoint, we're proud to be the first to provide web-based, business-to-business applications designed specifically for companies throughout the fuel supply chain and petroleum distribution market. Our product suite provides an effective communication architecture that brings more efficient business processes, cost savings, and valuable business intelligence to each member of the supply chain. We're committed to helping convenience stores, fuel outlets, and all fuel suppliers increase company efficiencies and improve their buying and administrative operations.

Company highlights:

- Founded in 1999
- Headquartered in Louisville, KY
- 250 petroleum carrier relationships
- 20,000 retail and wholesale fuel sites tracked with our product
- 20 billion gallons of fuel replenished annually
